Summary

Experienced Power Platform Developer with 8+ years of hands-on experience designing and delivering PowerApps solutions across a range of industries. Skilled in building both Canvas and Model-Driven apps, automating workflows using Power Automate, and integrating solutions with SharePoint, Azure, and Dataverse. Proven ability to lead teams, mentor junior developers, and drive process improvements. Committed to continuous learning and delivering practical, user-focused solutions that create measurable business value.

Experience

TCS

Assistant Consultant • Kochi 06/2025 - Present

- Delivered a **PowerApps Canvas App** solution integrated with SharePoint lists to enable secure collaboration between internal and external users.
    - Implemented domain-level access control to restrict which external domains could be granted permissions.
    - Built approval workflows in Power Automate to manage external user access requests (approve/reject).
    - Designed multiple app screens, including an approval dashboard for managers and a validation screen to track and verify all requests created through the app.
    - Added a revocation feature to remove user access automatically once tasks were completed, ensuring compliance and data governance.
- **Developed a dynamic Power Pages portal** utilizing **Liquid templates** and **Portal Web APIs** to manage multi-step vendor registration, performance tracking, and secure document management via integrated **SharePoint**.
- Managed complex data integrations via **Dataverse** Web API and FetchXML, successfully resolving cross-system challenges involving UTC timezone alignment and HTML entity encoding across multi-station workflows.

HCLTech

Lead Consultant • Bengaluru 07/2022 - 05/2025

- Led a team of three, supporting Fusion and Citizen developers in Power Platform initiatives.
- Conducted Power Platform training for Blue Prism developers, enhancing automation capabilities across teams.
- Designed and delivered multiple enterprise-grade PowerApps solutions, including:
    - **Incident Management App** – Replaced ServiceNow with a Canvas app integrated with PagerDuty, reducing licensing costs and improving incident tracking efficiency.
    - **Shift Allowance App** – Automated shift approvals and payroll processes, reducing manual errors and processing time.
    - **Inventory Management App** – Provided real-time inventory tracking, multi-level approvals, and predictive analytics for production planning.
    - **Multi-Factor Authentication (MFA) App** – Created a secure OTP retrieval system for service accounts using Azure Key Vault and C#.
    - **Damage Reporting App** – Enabled vehicle damage reporting with barcode/VIN scanning, image capture, and in-app annotation for precise visual documentation.
- Collaborated with stakeholders to optimize business processes and automate daily operations.
- Recognized in the company newsletter for the inventory app implementation, which was proposed for expansion across multiple plants.
- Implemented process improvements that enhanced efficiency, reduced manual effort, and improved overall productivity.

Mindtree

Module Lead • Bengaluru 09/2021 - 07/2022

- Developed and integrated **Canvas Custom Pages** into **Model-Driven Apps**, significantly enhancing user experience and functionality.
- Designed **Power Automate** flows to trigger real-time security notifications for Microsoft Dynamics 365 users.
- Managed environment migrations using solutions, ensuring smooth and error-free deployments across multiple teams.
- Automated data management processes within **SharePoint** and **Azure Blob Storage** to improve operational efficiency.
- Led a team of four developers, providing guidance, code reviews, and mentoring to deliver high-quality solutions.

Wipro

Senior Software Engineer • Hyderabad 12/2016 - 09/2021

- Developed and maintained PowerApps solutions for enterprise-scale applications in the aviation sector.
- Led SharePoint Online migrations, converting legacy Nintex workflows and InfoPath forms into modern PowerApps solutions.
- Designed and implemented automated approval processes using Power Automate to support business-critical operations.
- Delivered hypercare support, efficiently resolving production issues and ensuring system stability.
- Managed a team for SharePoint migration projects, ensuring seamless transitions, data integrity, and minimal business disruption.

Independent Projects & Initiatives

Live Gold Kerala | Full-Stack Developer & Founder

- **Platform Overview**: Developed and maintain a real-time data platform, livegoldkerala.com, providing live commodity pricing for the Kerala region.
- **Technical Implementation**: Engineered automated data scraping and update pipelines to ensure high availability and accuracy of financial data.
- **Performance Engineering**: Scaled the platform to handle consistent traffic, focusing on performance optimization and automated troubleshooting for data stalling issues.

AskStage | Full-Stack Developer

- **Product Scope**: Askstage is a full-stack real-time Q&A and live voting platform for events, allowing audience members to join via QR code and submit questions instantly without account creation.
- **Real-Time Architecture**: Implemented live updates using **Supabase Realtime** subscriptions and Row-Level Security (RLS), with host moderation controls (approve, dismiss, pause queue) served via **Next.js App Router API**.
- **Security & Governance**: Hardened the moderation layer against Unicode homoglyph attacks and leet-speak substitution, while implementing RFC 6585-compliant rate limiting (429 + Retry-After) at the API layer.
- **Quality Assurance**: Authored a **Playwright** test suite covering 15 adversarial profanity filter cases and load simulation scripts, integrated into CI via a project-scoped test runner configuration.

Skills

PowerApps (Canvas & Model-Driven), Power Automate, Power BI Microsoft Technologies: SharePoint Online, SharePoint Designer, InfoPath, Microsoft Dynamics 365 Development & Integration: JavaScript, HTML, CSS, C#, Azure Functions, REST APIs Database Management: Dataverse, SQL Server, SharePoint Lists, CDS Automation & Migration Tools: ShareGate, Metalogix, Nintex Workflows Cloud & Security: Azure Key Vault, MFA implementation, Claude, Gemini, Next.js, React, TypeScript, Supabase, PostgreSQL, Row-Level Security, Vercel, Playwright, CI/CD, Automated Scraping
